TITLE Alabama Annual Evaluation Report: Title I Programs, Fiscal Year 1970. Title I of Public Law 89-10, the Elementary and Secondary Education Act of 1965.

INSTITUTION Alabama State Dept. of Education, Montgomery.

PUB DATE 70

NOTE 36p.

EDRS PRICE EDRS Price MF-\$0.65 HC-\$3.29

DESCRIPTORS Academic Achievement, Achievement Gains, Community Involvement, \*Compensatory Education, Delinquent Rehabilitation, \*Disadvantaged Youth, \*Federal Programs, Handicapped Students, Inservice Education, Parent Participation, \*Program Evaluation, Retarded Children, Standardized Tests, Teacher Aides, Teacher Education, Test Results

IDENTIFIERS Alabama, \*Elementary Secondary Education Act Title I, ESEA Title I

ABSTRACT

This evaluation attempts to measure the extent and effectiveness of ESEA Title I programs designed to meet the needs of disadvantaged children and apprizes the public and the legislature of program outcomes. In keeping with USOE requirements for evaluating Title I programs, this document is constructed of (1) responses to USOE probes by questionnaire sequence, (2) applicable supplementary or background information, and (3) available related findings. Data were collected from interviews with selected personnel from the Alabama State Department of Education; reaction reports from teachers, administrators, State ESEA Title I personnel, and university personnel; onsite visitations by Title I staff and university consultants; and evaluation supplement and narrative reports distributed to local educational agency Title I directors and activity directors. A related document is ED 037 514. (Page 11 may reproduce poorly.) (EA)

## Evaluation Report for Fiscal Year 1970

This report is based on the list of questions supplied by the U. S. Office of Education.

STATE TITLE I, ESEA EVALUATION

QUESTIONS FOR FY 1970

FY 70

I. Provide the following basic State statistics:

A. Total number of operating LEA's in the state	121
B. Number of LEA's participating in Title I	119
1. During regular school term	119
2. During summer term only	None
3. During both regular and summer	119
C. Number of Title I programs	119
D. Number of Title I participants	777,634
1. Public schools	767,768
2. Private	5,073
3. Not enrolled	
( Library Services, Recreational, Dropout Programs )	4,793
E. Number of institutions participating	5
Number of children in institutions	2,974
F. Number of migrant programs	7
Number of migrant participants	1,073

II. During FY 1970, indicate the number of SEA Title I staff visits to LEA's participating in Title I. By objective of visit (planning, program development, program operation, evaluation, etc.), specify the purposes of these visits and their effect on the development, operation, and evaluation of local projects. Indicate proportion of visits, by type.

Each of the 119 LEA's was visited during the regular term at least once by SEA Title I staff members for the purpose of making administrative reviews or reviewing special programs. These reviews were to check the program while in operation to see if the LEA's were doing what they had written into their applications. Follow-up letters were written

reporting the findings, pointing out any variations being made and making suggestions.

The SEA does not take part in the actual program planning and development except when asked. Training in writing project proposals was given at area conferences and at a three-day state-wide summer conference.

A field accountant was employed in October to aide LEA's with accounting problems. His service has been very helpful to the LEA's. He did special accounting reviews in 24 LEA's before the year was over. The reviews were designed to point out any procedures which were not being done in compliance with federal and state regulations. He assists new bookkeepers and accountants in setting up correct systems of accounting.

Arrangements were made for twenty principals and supervisors to visit the summer programs. These people received one day of orientation and a special outline to follow in reviewing and reporting. Each of the five Title I consultants worked with four of the reviewers who were assigned to particular LEA's. This proved to be very good for public relations and dissemination.

The LEA coordinators made many visits to the SEA office. They felt free to call or come in any time they had questions or needed help.

Records were kept by the SEA Title I staff members, including the accountant and the statistician. The combined numbers are large because four people may have seen the same person. A LEA coordinator usually saw the consultant assigned to his system, the evaluation consultant, the bookkeeper, statistician, etc. on one trip. Each staff member used the following form on which totals of sheets for 6 staff members are combined.

TITLE I ESEA

INVOLVEMENT OF STAFF MEMBERS IN CONFERENCES AND FIELD SERVICES FY 70	
1. Office conferences with educators	988
Office conferences with others	402
Telephone conferences with LEA's	2,306
2. Participation in Educational Conferences	
Local	86
Statewide	12
Regional	60
National	36
Other educational conferences attended	6
Regular staff meetings	64
Planning meetings for conferences	20
3. Field Services	
Days spent in the field	416
Visits to schools	306
Meetings with administrators	169
Meetings with school staff groups	121
Meetings with lay groups	46
Meetings with college or university groups	64

III. Describe any changes your agency has made in the last three years in its procedures and the effect of such changes to:

- A. improve the quality of Title I projects
- B. insure proper participation of nonpublic school children
- C. modify local projects in the light of State and local evaluation

- A. The quality of Title I projects improved as the LEA staff members became more capable of planning and administering the programs. The greatest difficulty has been in helping the LEA's adjust programs at the last minute due to the closing of schools by court orders. The amount spent, on equipment was reduced from 3.7 percent of the total allocation in 1969 to 1.1 percent in 1970, while the amount spent on personnel increased. More questions were asked about whether proposed programs, such as guidance and driver education, were supplanting rather than supplementing or were also being funded through another source. LEA's were urged to concentrate activities and services in elementary areas as much as possible on a limited number of participants. They were also urged to assess needs and be more specific in selecting participants.
- B. The SDE felt no need to modify its criteria for program approval providing for children enrolled in non-public schools. Fifty-one non-public schools in 23 LEA's had 5,073 participants in Title I programs. These were mainly parochial schools which are discussed in Part V. Other non-public schools were organized to take the children out of integrated schools. They were not in compliance with the Civil Rights Act and had no wish for any federal aid.

The coordinator of governmental programs named by the superintendent of the Catholic schools attended the Title I workshops and met with public school coordinators to help plan programs. He furnished information needed for determining eligibility of the parochial schools and provided

lists of needs of the schools. He and the LEA staff members enjoy a good relationship. Children from non-public schools were urged to take part in the summer programs.

C. The LEA project planning was affected by evaluation requirements. The LEA's were required to write specific measurable objectives and plans for evaluating each objective. This caused them to cut down on the number of projects to be implemented. The LEA's which did not have trained personnel for grading and interpreting tests wrote into their budgets a sum for evaluation. The SEA evaluation consultant assisted in 10 LEA workshops. She shared copies of checklists and other evaluation materials with the LEA's at state-wide meetings. A format for the 1970 annual evaluation report was supplied to the LEA's in June of 1969. Thus, the LEA's knew what was required for evaluation before the 1970 applications were written. Individual and/or small group conferences on evaluation methods were held and evaluation was discussed at a state-wide meeting.

#### IV. Effect upon Education Achievement

A. What effect, if any, has Title I had upon the educational achievement of educationally deprived children including those children enrolled in non-public schools in your State? On the basis of objective State-wide evidence - not testimonials or examples but hard data -- describe the impact on reading achievement levels of educationally deprived pupils, including non-public school pupils. With standardized achievement test results, compare the achievement of participants in Title I projects to that of all pupils of the same grade level in the State using current national and statewide norms and specify the norms used. All evidence should be based on the educational performance of a significant number of Title I participants in your State. Indicate the number of Title I participants for which data are presented.

B. What are common characteristics of those Title I projects in your State that are most effective in improving educational achievement?

C. What evidence, if any, have you found in your State that the effectiveness of Title I projects is related to cost?

A. Objective data

Test results from standardized tests (California Achievement) are on pages 31-34. These results were given because there were more of them. The LEA's chose the reading programs they wished to use and the tests they used. Many used tests that came with the reading materials. Therefore, a variety of tests were used. The teachers wrote many glowing reports of progress and human interest stories. Those reports are attached to the special reports requested by the U.S.O.E. They were enthusiastic and pleased with the progress made even though standardized test results do not show much improvement. The lack of progress shown was often due to the facts that many of the pupils had no test experience and had not been trained to follow directions, some of the teachers had no experience in administering standardized tests, and the tests were not designed for deprived children. With the pupils being moved, it was almost impossible to do pre and post testing on the same children. It was impossible to stabilize groups long enough to conduct experiments when new court orders were issued regularly.

Test results are also included in many of the special reports mentioned previously.

B. The most effective programs were in intensive reading programs which were aided through teacher-training; use of aides; more and better supplies and equipment; the supplying of food and health services; and the cultural enrichment programs. The effects were cumulative rather than separable.

C. Earlier effectiveness was directly related to cost due to the need for supplies, equipment and facilities. The need for those things has leveled off, but the need for trained personnel, or the training of personnel has increased. Therefore, the effectiveness of the programs was still related to cost. Sixty LEA's reported that they were unable to employ trained reading teachers. Others were unable to employ remedial math teachers, elementary counselors, school nurses, etc. Teachers are not willing to attend colleges in the summer when the funding of the Title I program is so uncertain.

V. What effect, if any, has the Title I program had on the administrative structure and educational practices of your State Education Agency, Local Education Agencies, and non-public schools?

Title I has had a definite effect on the SEA, LEA's and non-public schools in areas not covered in Part III above. The SEA, through necessity, became more involved than ever before in working with the local systems. The SEA was more aware of the problems of assessing needs and in staffing and administering programs which beset the LEA's. Through visiting and helping, workshops and conferences, the SEA became more conscious of the needs and problems and of the part it must play.

The LEA's were more conscious of the need for long-range planning. There was more sharing of experiences and problems as mutual involvement grew. Practices used in special Title I programs have spilled over into the regular program. The involvement of parents has also grown. Reports of parent and community involvement are attached.

The SEA and LEA's had more communication with the nonpublic schools which saw an advantage in becoming a part of the total school program.

The school program in Alabama has been upgraded by having the use of Title I funds to meet needs in instruction, services, and training, and by having specific procedures to follow in planning and administering programs.

VI. Additional Efforts to Help the Disadvantaged

A. If State funds have been used to augment Title I programs, describe the number of projects, objectives of the programs, rationale for increased funding with State money, and the amount and proportion of total program funds provided by the State for the 1969-70 school year. Indicate the number of projects, number of participants, objectives of the programs, and the level of funding for the 1969-70 school year. Provide data separately for all compensatory education programs, if any, supported entirely by State funds which were operated specifically for the educationally deprived.

The funds appropriated by the State for the programs described below are supplementary to other funds which may be federal or local.

1. Free Textbooks - To guarantee that all children had access to needed books the state appropriated \$1,756,452 for textbooks.
2. Exceptional Children - The State paid for 609 classroom teachers and for transportation to centers. The classes were for mentally retarded, physically handicapped, speech disorders, emotionally disturbed, aphasoid, hard-of-hearing, home bound, socially maladjusted, and trainable. In addition to paying the teachers as regular teacher units and supplying transportation for those able to ride a regular school bus, appropriations were as listed on the following pages.

These classes were held within the buildings where other classes were held, when feasible. Teachers were required to hold a major in special education as specified by the State Department of Education (Certification). Each child had a complete physical and mental evaluation. The teacher-pupil ratio was held very low, and teaching was on an individual basis.

3. Three Industrial Schools - Appropriation \$1,217,266 for delinquent and neglected children. These schools provided academic instruction and industrial training. Living quarters, food, and clothing were provided. Residents worked on projects which trained the students for future jobs and brought some income to the school. Psychologists and counselors worked with the residents for a change in attitude and upgrading of self-image. Teaching techniques were those needed as indicated by test results. Teaching was individualized as much as possible.

4. Partlow State School - For retarded children. The State appropriation was \$225,523. This school is adjacent to the campus of a State mental institution for adults which receives a fairly large appropriation. Many of the services available in the mental institution were also available to Partlow through the use of state-grown food supply, use of medical doctors, psychologists, chaplains, art and craft teachers, and facilities for these activities. Many private organizations make regular contributions to the school.

Techniques used were those used for special classes for mentally retarded children. The children live there the year round, so much training is given in group living. The atmosphere is excellent, but the facilities are very overcrowded. The pupils appear very happy. They look forward to training in the crafts shop, singing in the chapel, picnics, etc. Student teachers from the nearby University of Alabama who are majoring in guidance

and counseling, special education, speech therapy, music, art, etc. spend many hours with the children.

5. Alabama Institute for Deaf and Blind received a State appropriation of \$1,609,281. A State-owned farm supplements the income by supplying fresh vegetable, poultry, pork, and beef for the students, all of which live on the campus. There is also a meat processing plant. This institution also gains some income from the sale of art and craft objects made by the students and sold by members of service clubs and religious and professional groups. These groups also make contributions to the school as part of their service projects.

Techniques used are those which are most suited to the particular handicap.

B. Provide descriptions of outstanding examples of the coordination of Title I activities with those of other federally funded programs. Identify the other programs and agencies involved.

INTERRELATIONSHIP OF TITLE I WITH OTHER FEDERAL AND STATE PROGRAMS

If funds or services from other ESEA Titles or from other local, State or Federal programs or agencies were used in cooperation with the Title I funds, check as many of the sources of supplementary assistance to this Title I project as apply.

(The 119 LEA's marked the programs as tabulated below. Details are on the following pages.)

<u>118</u>	ESEA Title II
<u>39</u>	ESEA Title III
<u>15</u>	ESEA Title IV
<u>27</u>	ESEA Title V
<u>37</u>	ESEA Title VI-A
<u>14</u>	Education Profession Development Act
<u>73</u>	U. S. Department of Agriculture Food Program
<u>43</u>	Headstart - OEO - Community Action Agency
<u>40</u>	Neighborhood Youth Corps - OEO - Community Action Agency
<u>103</u>	NDEA Title III
<u>41</u>	NDEA Title V-a
<u>43</u>	Vocational Education Act of 1963
<u>4</u>	George Barden Act
<u>16</u>	Smith Hughes Act
<u>0</u>	Job Corps
<u>56</u>	State Social and Welfare Agencies
<u>22</u>	Federal Social and Welfare Agencies
<u>21</u>	Medical Aid to Indigent Families
	Other (Specify)

1. College Work Study Program
2. Mental Health Centers
3. Society for Crippled Children
4. Rehabilitation
5. Cooperative Extension Services
6. Adult Basic Education
7. NDEA V-B
8. Teacher Corps
9. VISTA
10. CAP (Emergency Food and Medical Services)

1. Community Action Agencies -- There are 24 CAA's in Alabama. Fourteen of these agencies serve two or more school districts. These agencies have been very helpful in locating deprived children and assessing needs through surveys. They have helped with parental involvement by acquainting them with services which are available through CAA and Title I and by offering services such as counseling, recreation, and night classes to parents. CAA has supplemented Title I by aiding in preschool services. Records from Head Start are made available to first grade pupils. In one LEA a music teacher was supplied by Title I for training Head Start children.
2. Title II has been the program most coordinated with Title I. Library books and audiovisual materials have been used by Title I participants. Librarians and aides employed under Title I maintain and distribute these materials. Special emphasis is placed on reading and related activities in Title I programs. This effort is enhanced by Title II.
3. Title III ESEA -- Twenty-eight Title III programs were in operation. Those which were most coordinated with Title I were the media centers which served several surrounding areas. Materials and services were invaluable to Title I programs. Title III teacher-training centers and workshops were used by Title I personnel. Cultural arts projects were used by Title I cultural enrichment programs.
4. Title III N.D.E.A. -- Materials bought through this program were used to great advantage by Title I participants.

5. Title IV -- No Title IV projects were operated through the State. Several LEA's had projects which were conducted through a regional manager who works out from the Atlanta office. Those LEA's used Title IV funds for extended school days, tutorial programs, hiring and training personnel, and trips for teachers to view and study innovation methods being used in other areas.
6. Title V -- ESEA -- Coordination of Title V and Title I within the SEA has effected peripheral benefits to the LEA's. Title I funds were used in conjunction with Title I funds in a study of the organization of the SEA; in providing consultative and technical assistance in academic areas and in special education; in providing leadership and consultative services to schools trying to meet accreditation standards; in collecting and storing information through the use of data processing; through providing services that assist in developing, improving, and expanding activities of the school lunch and transportation programs and of the graphic arts section; and in initiating and implementing an in-service program for all SEA personnel. All of these activities had a positive effect on the LEA's through supplying leadership and services which affected all programs being conducted by them.

Ten percent of the Title V money was distributed to local school systems on the basis of need for planning and/or implementing programs for the development, improvement, or expansion of activities at the local, county, or regional level. All systems were eligible to submit applications for the Flow Through funds.

Six LEA's applied for funds. Four other systems applied for funding to conduct area workshops for working on an incentive pay plan for teachers. The titles of the projects which follow indicate how the funds were used in programs designed to meet identified needs and that these programs were adaptable to those provided with Title I funds:

Developing Professional and Lay Leaders

Middle-School Planning

Video-Tape Media

Cooperative Research

Local Efforts Study

Inservice Training

Workshops/Incentive Pay

Area I - Decatur

Area II - Birmingham

Area III - Pike County

Area IV - Monroe County

7. Title V - A & B, N.D.E.A. -- Title V staff members have aided with Title I evaluations and other testing programs. Title V - trained counselors have been paid from Title I funds.

8. N.Y.C. -- Title I coordinators worked closely with the N.Y.C. in cooperative plans for supplying work training and night classes. In some LEA's trainees worked as library trainees, reading center assistants, and aides. One LEA had a N.Y.C. summer tutoring program.

9. S.E.L. -- Five LEA's have taken part in pilot studies administered by the Southeastern Laboratories. The experience has been good for the LEA's, and the testing program conducted by S.E.L. was helpful to Title I teachers, especially in LEA's where teachers were not well-trained in testing and analyzing test scores. The main areas of study were in communication skills and readiness.
10. Headstart -- Programs for preschool children funded by O.E.O. were held in the districts where C.A.A.'s existed. During the regular term, 17 Headstart programs were held for one half day, eleven for a full school day, and eleven for summer only. The programs are very helpful in preparing students for school, especially in the communications area. Student records are available to Title I teachers. Some of the programs were administered by the boards of education and were considered a very important part of the educational program.
11. Education Professional Development Act -- Six workshops or institutes were held under the B-2 program for training teacher-aides. One hundred thirty-seven aides were trained. Title I consultants helped with coordinating the training since the teacher-aides are employed with Title I funds. The teacher-aide training programs were coordinated with local, state and federal programs through the sharing of personnel, facilities and funds.

The teacher-training program helped relieve the need for elementary teachers in the area of remedial reading, speech

correction, etc. Sixty-six teachers trained in the B-2 program were employed with Title I funds.

12. Adult Basic Education -- Some students in this program were employed as Title I teacher or library aides.
13. State Social and Welfare Agencies -- These agencies supply information on low income children and help with clothing and other family problems. Title I supplements some of the services and often provides psychological testing.
14. Appalachian Funds -- The trade and technical schools funded by this agency provided training for Title I secondary students.
15. Vocational Education Act, George Barden Act and Smith Hughes Act -- Title I children were helped through vocational counseling and specially designed classes to meet their needs.

VII. Evaluate the success of Title I in bringing compensatory education to children enrolled in nonpublic schools. Include in your evaluation such factors as the number of projects, the quality of projects, the time of the day and/or year when projects are offered, the adaptions to meet the specific educational needs of educationally deprived children in nonpublic schools, changes in legal interpretations, and joint planning with nonpublic school officials.

The nonpublic schools in Alabama fall into two main categories: the private schools and the parochial schools.

The private schools which have been established as a protest against busing and over-crowded classrooms are not in compliance with the Civil Rights Act. The students are financially able to pay for all educational expenses. They refuse to participate in any way. The parochial schools and other nonpublic schools which were eligible to participate in Title I funds did so. There were no special projects written for nonpublic schools. One project was

written for each educational agency (county or city system). This project covered all eligible children regardless of the type of school.

All summer school programs were open to all children who wished to participate. The parents of those children whom the teachers felt really needed to be in summer school were especially urged to send their children.

The programs which were most adapted to the needs of deprived children were the reading, food, health (medical and dental), and cultural enrichment programs. The use of supplies and equipment also helped.

The best example of joint planning was that with the superintendent of the Catholic schools as reported in Question 3. Dual enrollment was offered in two urban systems so students from nonpublic schools might take courses offered in public schools which were not offered in nonpublic schools.

During the regular term 5,073 children in 51 nonpublic schools participated in Title I programs. In the five institutions which participated (delinquent, retarded, blind), there were 2,974 children.

VIII. How many LEA's conducted coordinated teacher-teacher aide training programs for education aides and the professional staff members they assist? What was the total number of participants in each project? Describe the general patterns of activities and provide specific examples of outstanding joint training programs.

The use of teacher and librarian aides increased in fiscal year 1970. During the regular term 1,439 teacher aides and 228 librarian aides were used. During the summer 1,129 teacher aides and 100 librarian aides were used. These totals do not include nurses' aides.

All of those systems using aides held special workshops for the aides and the teachers with whom the aides would work. All systems using aides required the aides to attend in-service sessions during the year and all special workshops. The in-service sessions included special programs dealing with such topics as early childhood education, new school developments, curriculum planning, educational development classes, etc. There were also departmentalized sessions in which teachers and aides worked together (physical education teachers and the aides who would work with them, librarians and aides who would work with them, etc.). EPDA B-2 conducted training sessions in 5 areas for 137 teacher aides. The Title I coordinator and superintendents held meetings with principals regarding the duties and use of aides in schools. The proper use of the aides was checked carefully by the consultants making administrative reviews of the Title I programs. A form for reporting workshops and in-service programs was included in the evaluation guide which reminded the LEA's of the Title I amendment concerning the training of aides. Copies of workshop schedules were enclosed with the special reports on teacher-aide programs.

IX. Describe the nature and extent of community and parent involvement in Title I programs in your State. Include outstanding examples of parent and the community involvement in Title I projects.

The responsibility of placing parents of deprived children on LEA advisory and planning committees was placed on the LEA's by the requirement from the U. S. Office of Education. The SEA insisted that this be done, and also urged the LEA's to write into the project application plans for involving the parents and community in school activities. Although there were some doubts on the part of the LEAs about the advisability of involving uneducated parents and of having success in getting the parent involved, a very good

beginning was made in FY 69. In FY 70 the involvement grew. At State area meetings the LEA's were encouraged to exchange ideas of successful involvement and of the attempts which failed. This was considered very helpful. Reports of involvement are included. A contact person is named on each report.

In some LEA's parents were lead by "out-siders" to create disturbances, make unreasonable demands, etc. The school routine in some LEA's was also interrupted by Civil Rights field workers and their demands. These incidents have tended to off-set gains made in parental involvement in those LEA's.
